Abdulrahman Ghareeb

Data Scientist

Obour City, Qalyubia, Egypt

📞 01068952684 ✉ abdulrahman.ghareeb97@gmail.com 🔗 GitHub

SUMMERY

I specialize in data analytics, helping organizations improve decision-making and reduce costs by Transforming raw data into actionable insights. With a proven track record as a data scientist, I bridge the gap between complex datasets and strategic solutions, ensuring measurable impact and innovation.

EDUCATION

Benha University, Obour city, Egypt   **(September 2021 – present)**
Bachelor Of Communications and Computer Engineering
GPA: 3.61

TRAININGS EXPERIENCE

IBM-Data science & AI with DEPI (October 2024 – May 2025)

Developed proficiency in mining data to identify past and future performance drivers, uncover new revenue opportunities, enhance operational efficiency, and improve customer experiences. Gained expertise in leveraging data for critical business insights to support decision-making and strategic planning.

Huawei cloud computing (June 2024-september 2024)

Faculty of Engineering at Shubra, Cairo, Egypt

The training taught me a deeper understanding of cloud architecture, security, and best practices for deploying scalable and secure cloud solutions. This experience significantly enhanced my skills in cloud computing and data management.

PROJECTS

E-Commerce Customer Churn (May2025)
An end-to-end machine learning project to analyze and predict customer churn in an e-commerce environment. It leverages data science to identify high-risk customers and uncover actionable insights for improving customer retention.

Link: E-Commerce Customer Churn

Products shipping program (May2024)
created a program using assembly to manage products and know all the details of each product and the first product to be delivered.

Link: Products shipping program

Probability Distribution program (December2023)
created a program using Python to predict customer arrivals using Poisson distribution to allocate staffing efficiently.

Link: Probability Distribution program

SKILLS

Technical Skills:
Data analytics, c++, java,
python, MATLAB
and LabVIEW

Soft skills:
Teamwork, time management,
Communication, solve problem

Languages:
Arabic: Native
English: Good

CERTIFICATIONS

DEPI (data science) Certification
Huawei Cloud Computing Certification
